Made in the UK

PGS#			BPS4						BES#			RTV0.5

SPECIAL CONDITIONS FOR SAFE USE:

These termination kits and the cable that enters them shall be fixed to a secure mounting point.

The component shall only be used with constant power or self-regulating trace heating cables within the following ranges: -40°C to 180°C (Standard RTV).

This is particularly relevant when the trace heating cable is installed on pipework that has a temperature outside these ranges, in this situation, the termination devices shall be positioned outside the insulation, and the user/installer shall ensure that they are not exposed to UV radiation.
